

Nuclear Latency (NL) Dataset  
Country Coding Sheets

**GERMAN DEMOCRATIC REPUBLIC**  
**COW COUNTRY CODE: 265**

A formerly top secret CIA document from 1974 indicates that East Germany had a gas centrifuge research program. There is scant evidence of this program in other sources, however. In the absence of further information, we exclude East Germany centrifuge work from the dataset. It is possible, of course, that we will add facilities for this country as new information emerges over time.
